

The top half of the page features a large image of two hands shaking in a firm grip. The background is a blurred industrial facility with tall chimneys and complex piping. Overlaid on this image are several circular icons connected by a network of lines. The icons include a gear, a robotic arm, a globe, a cloud with a server, a person wearing a hard hat, a factory, a gear with the number '4', and a circuit board with the letters 'AI'.

EN AUTOMATION CONSULTING SERVICES

OUR SOLUTIONS

The demand of keeping up with technology and industry trends can be overwhelming but is necessary for remaining competitive in today's marketplace. The EN Automation consulting services team is available to help clients apply best practices in determining how to utilize valuable resources to provide automation solutions that increase productivity and optimize operations.

EN Automation is a leading systems integrator across the manufacturing, energy, utilities, pipeline & facilities, and food & beverage industries. Our expertise comes from experience in many areas including control system design and integration, PLC, SCADA and HMI development, product life cycle management, obsolescence issues, system conversion, phased migration, total facility modernization, and more.

SOME AREAS WHERE EN AUTOMATION CONSULTING SERVICES CAN HELP:

- Automation

- Process improvement
- Data analytics
- Cybersecurity
- Networking
- Roadmap development
- IIoT
- MES
- Feasibility studies
- Training & support

Partner with EN Automation to evaluate operational objectives and implement efficient and reliable automation solutions.

EN Automation is CSIA-certified, ensuring our standards and processes meet industry requirements, while assuring clients that the solutions we provide will exceed their expectations. We are experienced in a wide range of hardware and software platforms with the highest levels of certification and several established partnerships with industry leading providers.

Our qualified automation engineers are ready to guide you on the digital transformation journey.

A great place to start is with EN Automation consulting services and our 3D process that prioritizes the client relationship. It begins with a Discovery meeting where client needs are assessed by listening, understanding, and identifying concerns. The Design phase involves the collection and evaluation of valuable data such as existing hardware, firmware, and software, and all the other important details needed to target the focus of the plan. Phase 3 includes the delivery of an automation roadmap that clearly marks the path moving forward, the plan for execution and the continued support from our team of expert engineers.

EN Automation leads the industry in best practices, with accessible resources located in regional offices across the nation. As a sector of ENTRUST Solutions Group, our automation team is part of a dynamic group providing the flexibility and scalability to simultaneously meet the demands of multiple projects.

Contact us today to setup a meeting with our consulting team.
